

Ankita Singh *Software Engineer*

☎ 8738915008 ✉ ankita638738@gmail.com 📍 Noida, Uttar Pradesh 🔗 LinkedIn 🐙 Github

📄 PROFILE

Software Engineer with 2+ years of experience building scalable web and desktop applications using React.js, Node.js, Express.js and Electron.js . Experienced in developing real-time applications, REST APIs , reusable components, and offline-first platforms. Strong understanding of JavaScript, component-based architecture, state management, and Agile Development practices. Passionate about building high-performance applications and solving real-world engineering problems.

📁 PROFESSIONAL EXPERIENCE

- | | |
|---|---|
| Software Engineer, PPS International Pvt Ltd | 2025/04 – Present
Greater Noida, India |
| <ul style="list-style-type: none">• Developed and maintained React.js applications for railway infrastructure systems using JavaScript, React Hooks, and reusable component architecture.• Designed and integrated RESTful APIs using Node.js and Express.js to support real-time data processing and application workflows.• Built responsive and interactive user interfaces, ensuring high performance and seamless user experience across modules.• Implemented real-time communication and data synchronization features for monitoring and information systems.• Participated in code reviews, debugging, and optimization activities to improve application quality and maintainability.• Collaborated with cross-functional teams in an Agile environment to deliver features from requirement gathering to production deployment. | |
| Graduate Engineer Trainee, PPS International Pvt Ltd | 2024/04 – 2025/04
Greater Noida, India |
| <ul style="list-style-type: none">• Built a cross-platform desktop data transfer tool using Electron.js, enabling secure file packaging and system integration for onboard train infotainment systems.• Developed and optimized full-stack web applications using React.js and Node.js, implementing RESTful APIs and reusable UI component libraries.• Supported the SPUT Tool and IOB Server with backend operations, request processing, and system reliability improvements.• Completed structured technical training in modern frameworks, accelerating onboarding and independent contribution within the first month. | |

🧠 SKILLS

Frontend :- HTML, CSS, SCSS, JavaScript (ES6+), TypeScript, React.js, React Hooks, Redux Toolkit, Context API, jQuery, Chakra UI, Bootstrap, React-Bootstrap
Backend :- Node.js, Express.js, JWT Authentication, Web Sockets, Socket.IO, CORS
Database :- MongoDB (NoSQL)
Tools & Technology :- Electron, Webpack, Babel, Vite, NPM, Yarn, Git, Github
Operating Systems :- Windows, Linux

📁 PROJECTS

- NVR – Network Video Recorder, Real time Video Monitoring Platform**
- Developing a real-time surveillance platform using React.js, Node.js, and Express.js.
 - Implementing RTSP and ONVIF protocols for IP camera integration and live video streaming.
 - Integrating WebSocket-based communication for real-time camera status updates and event notifications.
 - Building responsive interfaces for camera management, live monitoring, playback, and recording configurations.
 - Designing scalable REST APIs for user management, camera configurations, and system settings.

- Supporting multiple camera streams and real-time dashboards with optimized frontend performance.
- Collaborating with cross-functional teams to deliver features iteratively in an Agile environment.

SPUT TOOL, *Electron-Based Structured Data Automation Tool*

- Architected and developed a cross-platform Electron.js desktop application to automate structured data preparation and packaging for train infotainment systems.
- Automated the generation of a standardized folder architecture, ensuring full compatibility with the infotainment webserver content schema.
- Enabled management of multimedia assets — videos, images, and metadata — reducing manual packaging time significantly.
- Implemented data validation and error-handling mechanisms, improving deployment accuracy and reducing content errors.

INFOTAINMENT WEBSERVER, *Offline-Optimized Multimedia Streaming & Information Platform*

- Designed and built a full-stack web application enabling train passengers to access journey information, entertainment content, and railway service modules in low-network or offline environments.
- Developed interactive UI screens for multimedia playback (movies, videos, images) with smooth performance under constrained network conditions.
- Integrated a service request and complaint submission module, enhancing passenger experience and railway support responsiveness.
- Optimized asset delivery and rendering for offline-first performance, ensuring seamless playback without buffering.
- Built full compatibility with SPUT Tool-generated content packages for zero-friction deployment.

EDUCATION

B-Tech, CSE (78%), *Dr. A P J Abdul Kalam Technical University*

2020/08 – 2023/07
Jaunpur, Uttar Pradesh

Diploma, CSE [85%], *Board of Technical Education*

2017/09 – 2020/07
Jaunpur, Uttar Pradesh

High-School, PCM [83%], *Board of High School and Intermediate Education*

2016 – 2017
Jaunpur, Uttar Pradesh
